

# THE ENERGY POWER™ MIX TECHNOLOGY

**Acid Mixing Technology** with the latest electrochemical advancements in battery technology to eliminate **Acid Stratification**

With EcoSmart® MaxMix™ batteries, the motion of your vehicle causes the electrolyte to circulate and continuously mix — preventing acid stratification.

Acid Build-up / Stratification  
(all flooded batteries)

Homogeneous Acid Density  
(360° passive mixing)

## ELECTROLYTE

The homogeneous electrolyte is a prerequisite for a permanently powerful car battery.

## ACID COATING

The acid coating is the main cause of high loss battery capacity (Ah) and the premature wear of wet batteries and related parts.

## MIXING

Continuous electrolyte mixing, from our patented passive mixing cell inserts, ensures a homogeneous electrolyte and optimal electrochemistry.

## CYCLE STRENGTH

Electrolyte mixing more than doubles the cycle strength of batteries.

## BENEFITS

For the benefit of trucks, vans, and automobiles — including Start-Stop vehicles.

Energy Power Part Number	CCA	Reserve Capacity (minutes)
ECO-31A-950	950	200
ECO-31S-950	950	200
ECO-31A-850	850	185
ECO-31S-850	850	185
ECO-31A-750	750	170
ECO-31S-750	750	170

Energy Power Part Number	CCA	Reserve Capacity (minutes)
ECO-31A-750 HC	750	205
ECO-31S-750 HC	750	205
